

1. Advisor Authentication & Security Module

Source Tables: ADVISOR , ADVISOR_PASSWORD_RESET

Method	Endpoint	Primary Entity	Params / Body Content (JSON)	Description
POST	/api/auth/register	ADVISOR	Email, Password_Hash, Full_Name	Registers a new advisor account.
POST	/api/auth/login	ADVISOR	Email, Password_Hash	Authenticates advisor credentials.
POST	/api/auth/reset-request	RESET	Email	Generates a 6-digit Otp_Code and sets Expires_At.
POST	/api/auth/reset-verify	RESET	Email, Otp_Code	Validates OTP and sets Is_Used to TRUE.

2. Client Profile Management Module

Source Table: CLIENT **Note:** Supports full profile management. Deletion is omitted to preserve audit trails.

Method	Endpoint	Primary Entity	Params / Body Content (JSON)	Description
GET	/api/clients	CLIENT	Advisor_Id (Context/Header)	Lists all clients managed by the advisor.
POST	/api/clients	CLIENT	Full_Name, Email_Address, Phone_Number, Risk_Profile, Investment_Goal, Occupation, Employer, Investment_Horizon, Liquidity_Needs, Address	Onboards a new client with full profile and KYC details.

GET	/api/clients/{id}	CLIENT	Client_Id (Path)	Retrieves the complete client profile.
PUT	/api/clients/{id}	CLIENT	Full Object: All fields listed in POST	Full Update: Replaces the entire client record.
PATCH	/api/clients/{id}	CLIENT	Partial Object: e.g., {"Phone_Number": "..."}	Partial Update: Updates only the specific fields provided.
PATCH	/api/clients/{id}/kyc	CLIENT	Kyc_Status, Kyc_Document_Ref	Updates verification status and document links.

3. Asset Master & Market Data Module

Source Table: ASSET **Note:** This is the read-only master list of instruments (Equities, Mutual Funds, etc.).

Method	Endpoint	Primary Entity	Params / Body Content (JSON)	Description
GET	/api/assets	ASSET	Query Params: Symbol, Asset_Type, Sector	Search the master list of tradable instruments.
GET	/api/assets/{id}	ASSET	Asset_Id (Path)	Returns detailed asset info (Name, Type, Sector).

GET	/api/assets/{id}/price	ASSET	Asset_Id (Path)	Fetches the latest Current_Price.
------------	------------------------	-------	-----------------	-----------------------------------

4. Portfolio & Holdings Module

Source Tables: PORTFOLIO , HOLDING **Note:** Holdings act as the junction between Client Portfolios and the Asset Master.

Method	Endpoint	Primary Entity	Params / Body Content (JSON)	Description
GET	/api/clients/{id}/portfolios	PORTFOLIO	Client_Id (Path)	Lists all portfolios (Retirement, Growth) for a client.
POST	/api/portfolios	PORTFOLIO	Client_Id, Cash_Balance, Risk_Score	Creates a new portfolio container.
GET	/api/portfolios/{id}/holdings	HOLDING	Portfolio_Id (Path)	Lists all assets currently held in a portfolio.
POST	/api/portfolios/{id}/holdings	HOLDING	Portfolio_Id, Asset_Id, Quantity, Buy_Price, Target_Alloc_%	Adds a new asset position to the portfolio.
PUT	/api/holdings/{id}	HOLDING	Quantity, Buy_Price, Target_Alloc_%	Update: Modifies an existing position (e.g., error correction).

GET	/api/clients/{id}/assets	HOLDING	Client_Id (Path)	Aggregates all unique assets owned by a client across all portfolios.
------------	--------------------------	---------	------------------	---

5. Advisory, Compliance & Analytics Module

Source Tables: RECOMMENDATION , COMPLIANCE_LOG , WEALTHREPORT

Method	Endpoint	Primary Entity	Params / Body Content (JSON)	Description
POST	/api/recommendations	RECO	Portfolio_Id, Asset_Id, Header, Action (Buy/Sell), Rationale, Priority, Impact	Advisor generates personalized advice.
GET	/api/recommendations	RECO	Query Params: Portfolio_Id, Status (Pending/Approved)	Fetches advice filtered by status or portfolio.
PATCH	/api/recommendations/{id}/respond	RECO	Status (Approved/Rejected)	Tracks client acceptance or rejection of advice.
GET	/api/compliance/logs/{pid}	LOG	Portfolio_Id (Path)	Retrieves the immutable audit trail for a portfolio.

POST	/api/compliance/check	LOG	Portfolio_Id, Regulation (e.g., AML), Review_Type, Result, Description	Logs a new manual or automated compliance check.
GET	/api/analytics/report/{id}	REPORT	ReportID (Path)	Fetches metrics like ReturnRate and RiskScore.
POST	/api/reports/generate	REPORT	Portfolio_Id, GeneratedDate	Triggers the generation of a performance snapshot.
